

## Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

[Reports to the Supervising Surgeon-General, United States Marine-Hospital Service.]

*Case of yellow fever in New York.*

[Telegram.]

ST. GEORGE, S. I., October 27, 1898.

Yellow fever in New York—case left Habana October 20, was taken sick at sea October 22. *Plasmodia malriæ* not found; typhoid bacillus not found—urine contains albumin. \* \* \*

WHITE, Surgeon.

*Yellow fever at Monterey, Mexico.*

In response to Bureau telegram of the 21st, inquiring as to the truth of the report of yellow fever at Monterey, the following telegram was received:

LAREDO, TEX., October 25, 1898.

Dr. Turpin, sent by State of Texas to Monterey, investigated yellow fever—reports 40 cases. Shall I allow passenger train crews and coaches which pass Monterey and carry Monterey passengers to other points to cross frontier?

H. J. HAMILTON,  
Acting Assistant Surgeon, U. S. M. H. S.
